RUI NOBRE MARTINS

FULL STACK WEB DEVELOPER

ABOUT ME

I am Rui Martins, I have 34 years old and I recently finished a Full Stack Web Developer course. With this course I developed Front-end and Back-end abilities, allowing me to create completed and functional web solutions.

Beside my interest for web development, I am a sport enthusiastic for mountain bike rides. The bike rides keeps me physically active and also helps me to develop qualities, such as persistency, resilience and the capacity of embracing challenges, skills that I consider essentially for sports and professional career.

I am always looking for new challenges and opportunities to learn and grow, as personal and professionally. I believe that the combination of my technical abilities with my sports passion and an active lifestyle I become a dynamic and dedicated professional.
